FILTER BAGS

Filter bags have both the strength and durability required for commercial cleaning. With their high filtration, they provide cleaners and building occupants a cleaner and healthier environment.

Cleaner!

- Filter bags are treated with a permanent anti-microbial agent that provide effective resistance against growth of many odor causing bacteria, fungi, molds and mildew.

- Keep your environment allergy-free - Bags offer improved filtration, with up to 99% capture of allergens - far more efficient than household micro filter bags!

Healthier!

- With up to 55% more filter area, these bags offer greater dust holding capacity, and lower pressure drop. They also increase filter life by maintaining vacuum suction over a longer period of time

More Effective!
